Request for Proposals for HVAC Services
Responses to Written Inquiries from Proposers
Published: April 12, 2024

The following questions were submitted to the LHC concerning the above-referenced Request for Proposals for HVAC Services, originally published on March 19, 2024.

1. The HVAC chillers at the LHC have R22 Freon in them. Will this have to be covered under the contract?

Response: Yes, the LHC expects that the HVAC maintenance vendor selected for these services will supply all necessary components (parts, materials, and labor) to complete the HVAC maintenance. Some components may be subject to reimbursement as allowed by the LHC.
