Although a statewide application is possible within the Grantee’s software, there was a Grantee staffing restructure in FFY2025 that prevented implementation. Louisiana will be opening the locally available option in all areas with all Subgrantees in FFY2026 utilizing the same software.

- **Section 4.7** Added “In Order to receive crisis assistance: *Must the household have non-working heating or cooling equipment – Yes for Year-Round Crisis.”
- **Section 4.7** Clarified the explanations by adding the following additions in *italics*:

“For Bill Payment Crisis Assistance:

Eligible applicants are required to provide support documentation to establish a crisis situation. (i.e. Disconnect/Shut-Off Notice, Final Bill and proof of new account, doctor's statements or medical reports, and/or written estimates to refill fuel tanks). Crisis is First Come - First Serve.

Per Section 5.1, D. of the Louisiana LIHEAP Service Delivery Guide, ☐ Life-threatening crisis—Service shall be delivered within 18 hours from the date of the completed application.

o If the health or safety risk is due to illness or medical need, clients must provide documentation verifying the health or safety risk.

o If the health or safety risk is from extreme weather conditions, either heat or cold, the Subgrantee may document the emergency with a print-out of the weather advisory documenting the emergency by utilizing an internet weather advisory site.

For Equipment Repair and Replacement Crisis Assistance:

Clients are not required to have a disconnect or pending shut-off; however, documentation of non-working heating or cooling equipment must be provided.

For Disaster Relief Crisis Assistance:

Clients are not required to have a disconnect, pending shut-off, or non-working equipment.”

- **Section 9.1** *Removed* “There are 10 out of 152 energy vendors that are not set up to receive payments directly from the LHC. Most of these are very small vendors that refuse to sign a Vendor Agreement and provide other related documents. Applicants have minimal choice for utility vendors and must use the utility vendor in their location; therefore, LHC does not discriminate against an applicant whose vendor chooses not to sign. LHC is continuing to educate vendors in regards to the Vendor Agreement.”

- **Section 13.6** Updated to 68,961.
- **Section 16.1** *Removed* “LHC has worked with APPRISE, our HES software Developer, and LHC Technical Support department to collect the required performance data. There is still some trouble converting and matching the data received from the vendors to achieve an unduplicated count. The recent increased number of supplemental grants has also increased the difficulty in achieving an unduplicated count due to the extremely large data sets.

Louisiana completed the report internally for FY2023, and it was accepted May 2024. In October 2024, we will begin requesting vendor data for FY2024 and anticipate continued improvement in data collection.”
